PROFILE

Industrial and Production Engineering student at RUET focused on supply chain, logistics, and operations analytics. Skilled in Power BI, Excel, Python, and optimization, with hands-on industrial experience in production waste analysis and dashboard development. Interested in process improvement, data-driven decision making, and operational efficiency.

EDUCATION

B.Sc. in Industrial & Production Engineering

Rajshahi University of Engineering & Technology (RUET)

CGPA: 3.74/4.00 (through 6th semester)

2022 – Present

Expected Graduation: 2027

Higher Secondary Certificate (HSC)

Milestone College

2019 – 2021

GPA: 5.00/5.00

EXPERIENCE

British American Tobacco Bangladesh

Industrial Attachment Trainee – Filter Manufacturing Department

1 Month (Feb 26-Mar 26)

- Tracked production waste across 5+ waste categories and multiple KDF machines.
- Analyzed HCF waste and identified machine-level hotspots of 5.88% and 5.71%.
- Built an interactive dashboard for machine-, shift-, and daily-level waste monitoring.
- Identified key waste sources and improved waste visibility through structured data tracking.

PROJECTS

- Samsung Supply Chain & Logistics Dashboard** *Power BI*
Developed a dashboard analyzing inventory, shipments, supplier lead time, revenue, and operational KPIs using data modelling and DAX.
- Purchase & Shipping Analysis Dashboard** *Power BI*
Analyzed purchase orders, shipping performance, and cost trends through an interactive procurement and logistics dashboard.
- Time Study & Production Line Balancing**
Conducted time study and SMV analysis of a T-shirt assembly line; reallocated manpower and reduced workforce requirements from 34 to 32.
- Smart Temperature-Based Laptop Cooling Stand**
Designed a smart cooling stand using temperature sensing to automatically adjust fan operation based on laptop temperature.
- Uber Operations Dashboard** *Power BI*
Developed a dashboard analyzing booking trends, revenue, customer satisfaction, and operational performance using Power Query and DAX.

TECHNICAL SKILLS

Data & Analytics	Power BI, Advanced Excel, DAX, Power Query, Data Modelling, Python
Optimization	MATLAB, Gurobi, CPLEX
Programming	Python, C, HTML
Operations	Supply Chain, Logistics, Process Analysis, Line Balancing, Time Study, Inventory Management

CERTIFICATIONS & TRAINING

Google Project Management – Google	Supply Chain Logistics – Rutgers University
Supply Chain Planning – UC Irvine	Advanced Business Analytics – Johns Hopkins University
Data Analytics Job Simulation – Deloitte	Six Sigma White Belt – CSSC
Aspire Leadership Program, Cohort 5 – Aspire Institute	Excel Skills Job Simulation – Forage

ADDITIONAL

70% Scholarship – ISCEA Global Case Competition

Finalist IPEsphere 2.0 a national business case competition

2026
